Legally Notifiable STIs	318			1399			
Tuberculosis	85			411			

<sup>#</sup> Added to the list of notifiable diseases as of 30 Jun 2022. To date, all mpox infections detected have been Clade IIb infections.

<sup>^</sup> With effect from E-week 27, 2023, only confirmed cases of MERS will be reported, instead of the number of persons tested.

### Acute Respiratory Infection (ARI) Situation in Singapore 2025

ARI indicators for E-week 24 (8 - 14 Jun 2025) were as follows:

The average daily number of patients seeking treatment in the polyclinics for ARI was 2154 (over 5.5 working days) in E-week 24.

In E-week 24, the top respiratory pathogens among adult and paediatric samples from the National Surveillance Programme for Acute Respiratory Infection<sup>§</sup> (ARI) were:

- Adult samples: SARS-CoV-2 (16%), Human rhinovirus/enterovirus (16%) and Influenza (8%).
- Paediatric samples: Human rhinovirus/enterovirus (28%), Respiratory Syncytial Virus (11%), Influenza (9%) and SARS-CoV-2 (9%).

<sup>§</sup> CDA monitors the trends of respiratory pathogens in the community through our sentinel surveillance programme for Acute Respiratory Infections (ARI) which includes polyclinics and selected general practitioner (GP) clinics.

COVID-19 and Influenza

The proportion of patients with influenza-like illness (ILI) among the polyclinic attendances for ARI was 0.5%. The positivity rate for influenza among ILI samples (n= 138) in the community was 11% in E-week 24. The positivity rate for COVID-19 among ARI samples (n= 308) in the community was 15% in E-week 24.

Of the 100 specimens tested positive for influenza in May 2025, 18 were positive for Influenza A(pH1N1) (18%), 63 were positive for Influenza A(H3N2) (63%), and 19 were positive for Influenza B (19%).

Monthly Influenza Surveillance

Based on influenza-like illness (ILI) samples from GPs and polyclinics

WEEKLY INCIDENCE OF FOOD/WATER-BORNE DISEASES, 2024-2025

## WEEKLY INCIDENCE OF VECTOR-BORNE DISEASES, 2024-2025

The number of dengue notifications was 126 in E-week 24.

The number of hospital admissions remains stable at 15 in E-week 24, compared to 15 in E-week 23.

Preliminary results of all positive dengue samples serotyped in June 2025 showed DEN-1, DEN-2, DEN-3 and DEN-4 at 3.8%, 77.4%, 9.4% and 9.4% respectively.

WEEKLY INCIDENCE OF AIR/DROPLET-BORNE DISEASES, 2024-2025

WEEKLY INCIDENCE OF AIR/DROPLET-BORNE DISEASES, 2024-2025
